

LIQUID

2018 GEAR GUIDE

FORCE

AT LIQUID FORCE, HAVING FUN IS WHAT WE LIVE FOR!

You can see it in every product we make from our boards and bindings to our wakesurfers and vests. Our ultimate goal is to maximize everybody's fun on the water. 2018 will be our 22nd year in business and we are even more stoked on wakeboarding now then we were the first time we ever stood sideways behind a boat!

On the board side, we have some Relentlessly Innovative fun stuff like the Butterstick and its new sibling, the Noodle which features an asym side-cut. These boards ride so effortlessly and differently than other boards that they will rekindle your love for wakeboarding! For behind the boat, the Timba delivers amazing pop with flex and soft landings that will definitely make you smile!

On the binding side it's all about our truly fantastic 4D bindings that deliver amazing board response, edge control, and comfort. These are getting so popular that we now have tons of new bindings that use 4D- The Trek, Riot, Form, Flex, Hook, Idol, Tao, and Vida all use our patented 4D system. If you haven't tried a 4D binding yet, make sure you do because it will totally enhance your riding experience!

At Liquid Force, we have been wakesurfing for a long time... since the early 2000's when we came up with our first line of surfers, the Skim Skates, and many years before when we were just using old surfboards behind the boat. We loved wakesurfing back then and still do because it is so fun! For 2018 we are busting out with our biggest and best line ever including the super popular Keens, our fun shaped Happy Pills, the high performance Pod, the all new Wildcat, and the new Sheila which has a unique look and feel! Fun translates across our entire range of products, including our vest line which includes the unbelievably comfortable Ghost and Enigma styles!

We know that 2018 will be the best year ever for standing sideways behind a boat, at a cable or on a winch, so get out there on some Liquid Force gear and have some fun! We truly believe the Fun is Unlimited!

Thank you for the support and see you on the water!

Tony Finn, Founder

LIQUID FORCE TEAM

Wakeboarding is generally thought of as an individual sport...

We're out behind the boat or hanging from the cable line riding by ourselves, in our own head, thinking of the next trick we want to try. When we're competing we're by ourselves... Sure, we are able to watch what our fellow competitors are doing and want to "one up" them, but when it comes down to it, it's up to us and only us to land that next trick. We don't have an offensive line to block for us, a tall center to get the rebound, or a long throw from right field to get the person out at home that allows us to grab the win.

Or do we?

Maybe wakeboarding is more of a team sport than we realize. Without the support of our team of friends at the lake we wouldn't push ourselves to progress and we wouldn't have as much fun! We cheer each other on when a new trick is landed and give each other support, confidence, and even coaching to land that new trick.

With the construction of Area 52 a few years back, Liquid Force has become more of a tight team than ever. Constantly working together building the next obstacle, wall, rail, pole jam, etc... Working hard, but playing hard... barbequing, hanging out, talking shop, and enjoying a few beverages. We are a team working and playing together, pushing each other and the sport to take it to places we never dreamt it could reach.

Look at the riding these days... Double flips, huge wall rides, massive drops, unthinkable tricks on a wakeskate, most of this came as a result of a team effort. We push each other, congratulate each other, and more than anything, we have FUN together.

Team Work makes the Dream Work

TEAM
WORK
MAKES
THE
DREAM
WORK.

FLEXTRACK

THE INDUSTRY'S FIRST FLEXIBLE TRACK

A TRACK THAT MOVES WITH YOU AND THE BOARD AS YOU TWIST INTO CARVES AND PRESS ONTO RAILS

CREATING AN UNMATCHED CONNECTION, MAKING YOU AND YOUR BOARD ONE!

Why Should You Ride A FlexTrack And Why You Should Ride It With A 4D Binding...

The answer to this question is quite simple... because nothing you've ridden before will compare in terms of how well you'll feel connected to your board. A FlexTrack with a 4D binding is the ultimate setup for true response... you will feel as if your board and binding are one, not two items pieced together. Liquid Force is driven by offering products that allow you, the rider, to improve your riding skills every time you get on the water. FlexTrack is a tool to help you expand and push the limits on new tricks that might not have been previously possible. You will be amazed at how deep you can press any board with FlexTrack and how quickly the flex will rebound back and spring you into action. The response is truly amazing and we can't wait for you to experience it for yourself.

You Don't Already Have A 4D Binding?

What are you waiting for? Get yourself a pair of the most revolutionary wake bindings ever designed! If for some reason you can't, don't worry, we still love you and the new FlexTrack is compatible with any standard 6" spread chassis.

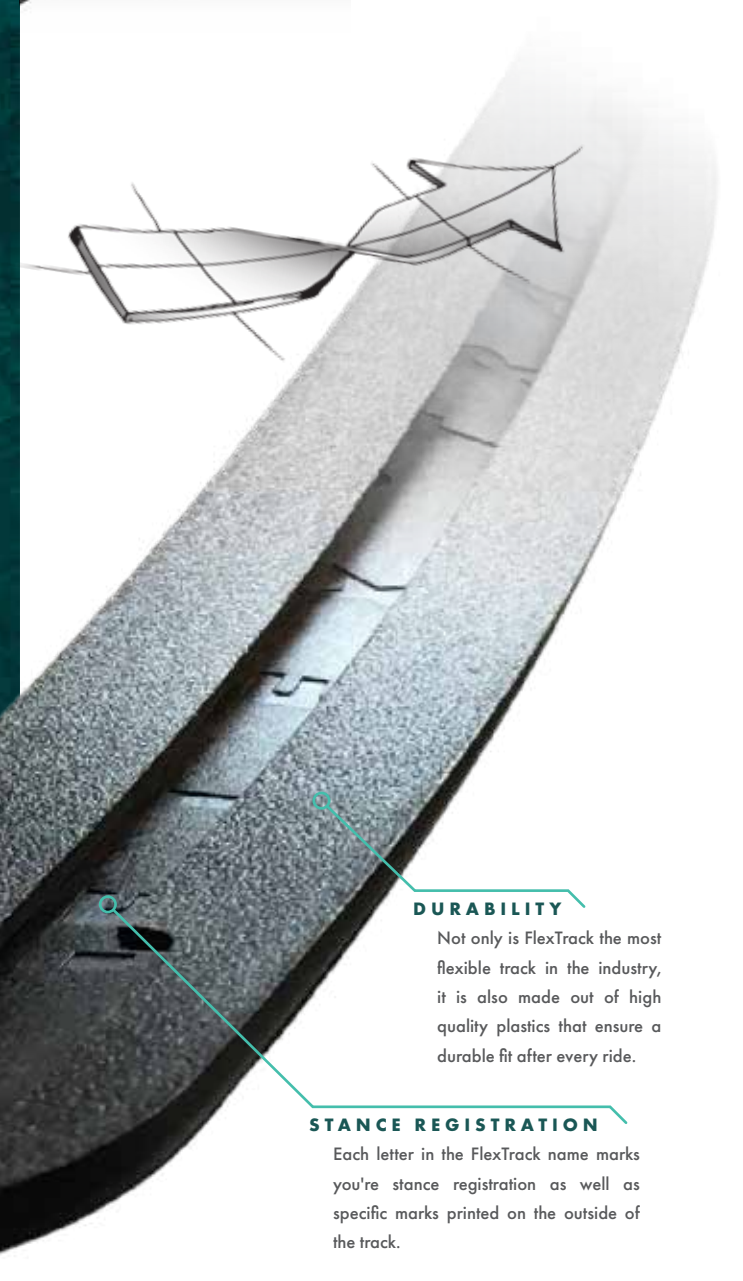

Does My Old Stance Translate?

Glad you asked. YES! Not only does your old stance translate, but the new Liquid Force FlexTrack actually opens up the door to micro adjustability. This means you can lightly set your stance, slip your feet in, twist and expand your stance to your own comfort, then lock it in tight!

MOLDED MICROTEETH

Microteeth provide an ultratight, non-slip binding to board interface giving you the micro-adjustability you have always dreamed of!

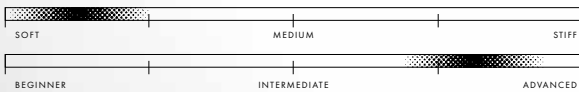

DURABILITY

Not only is FlexTrack the most flexible track in the industry, it is also made out of high quality plastics that ensure a durable fit after every ride.

STANCE REGISTRATION

Each letter in the FlexTrack name marks you're stance registration as well as specific marks printed on the outside of the track.

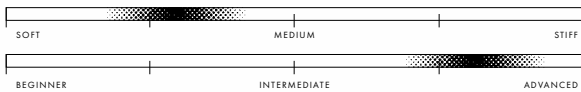

ECLIPSE

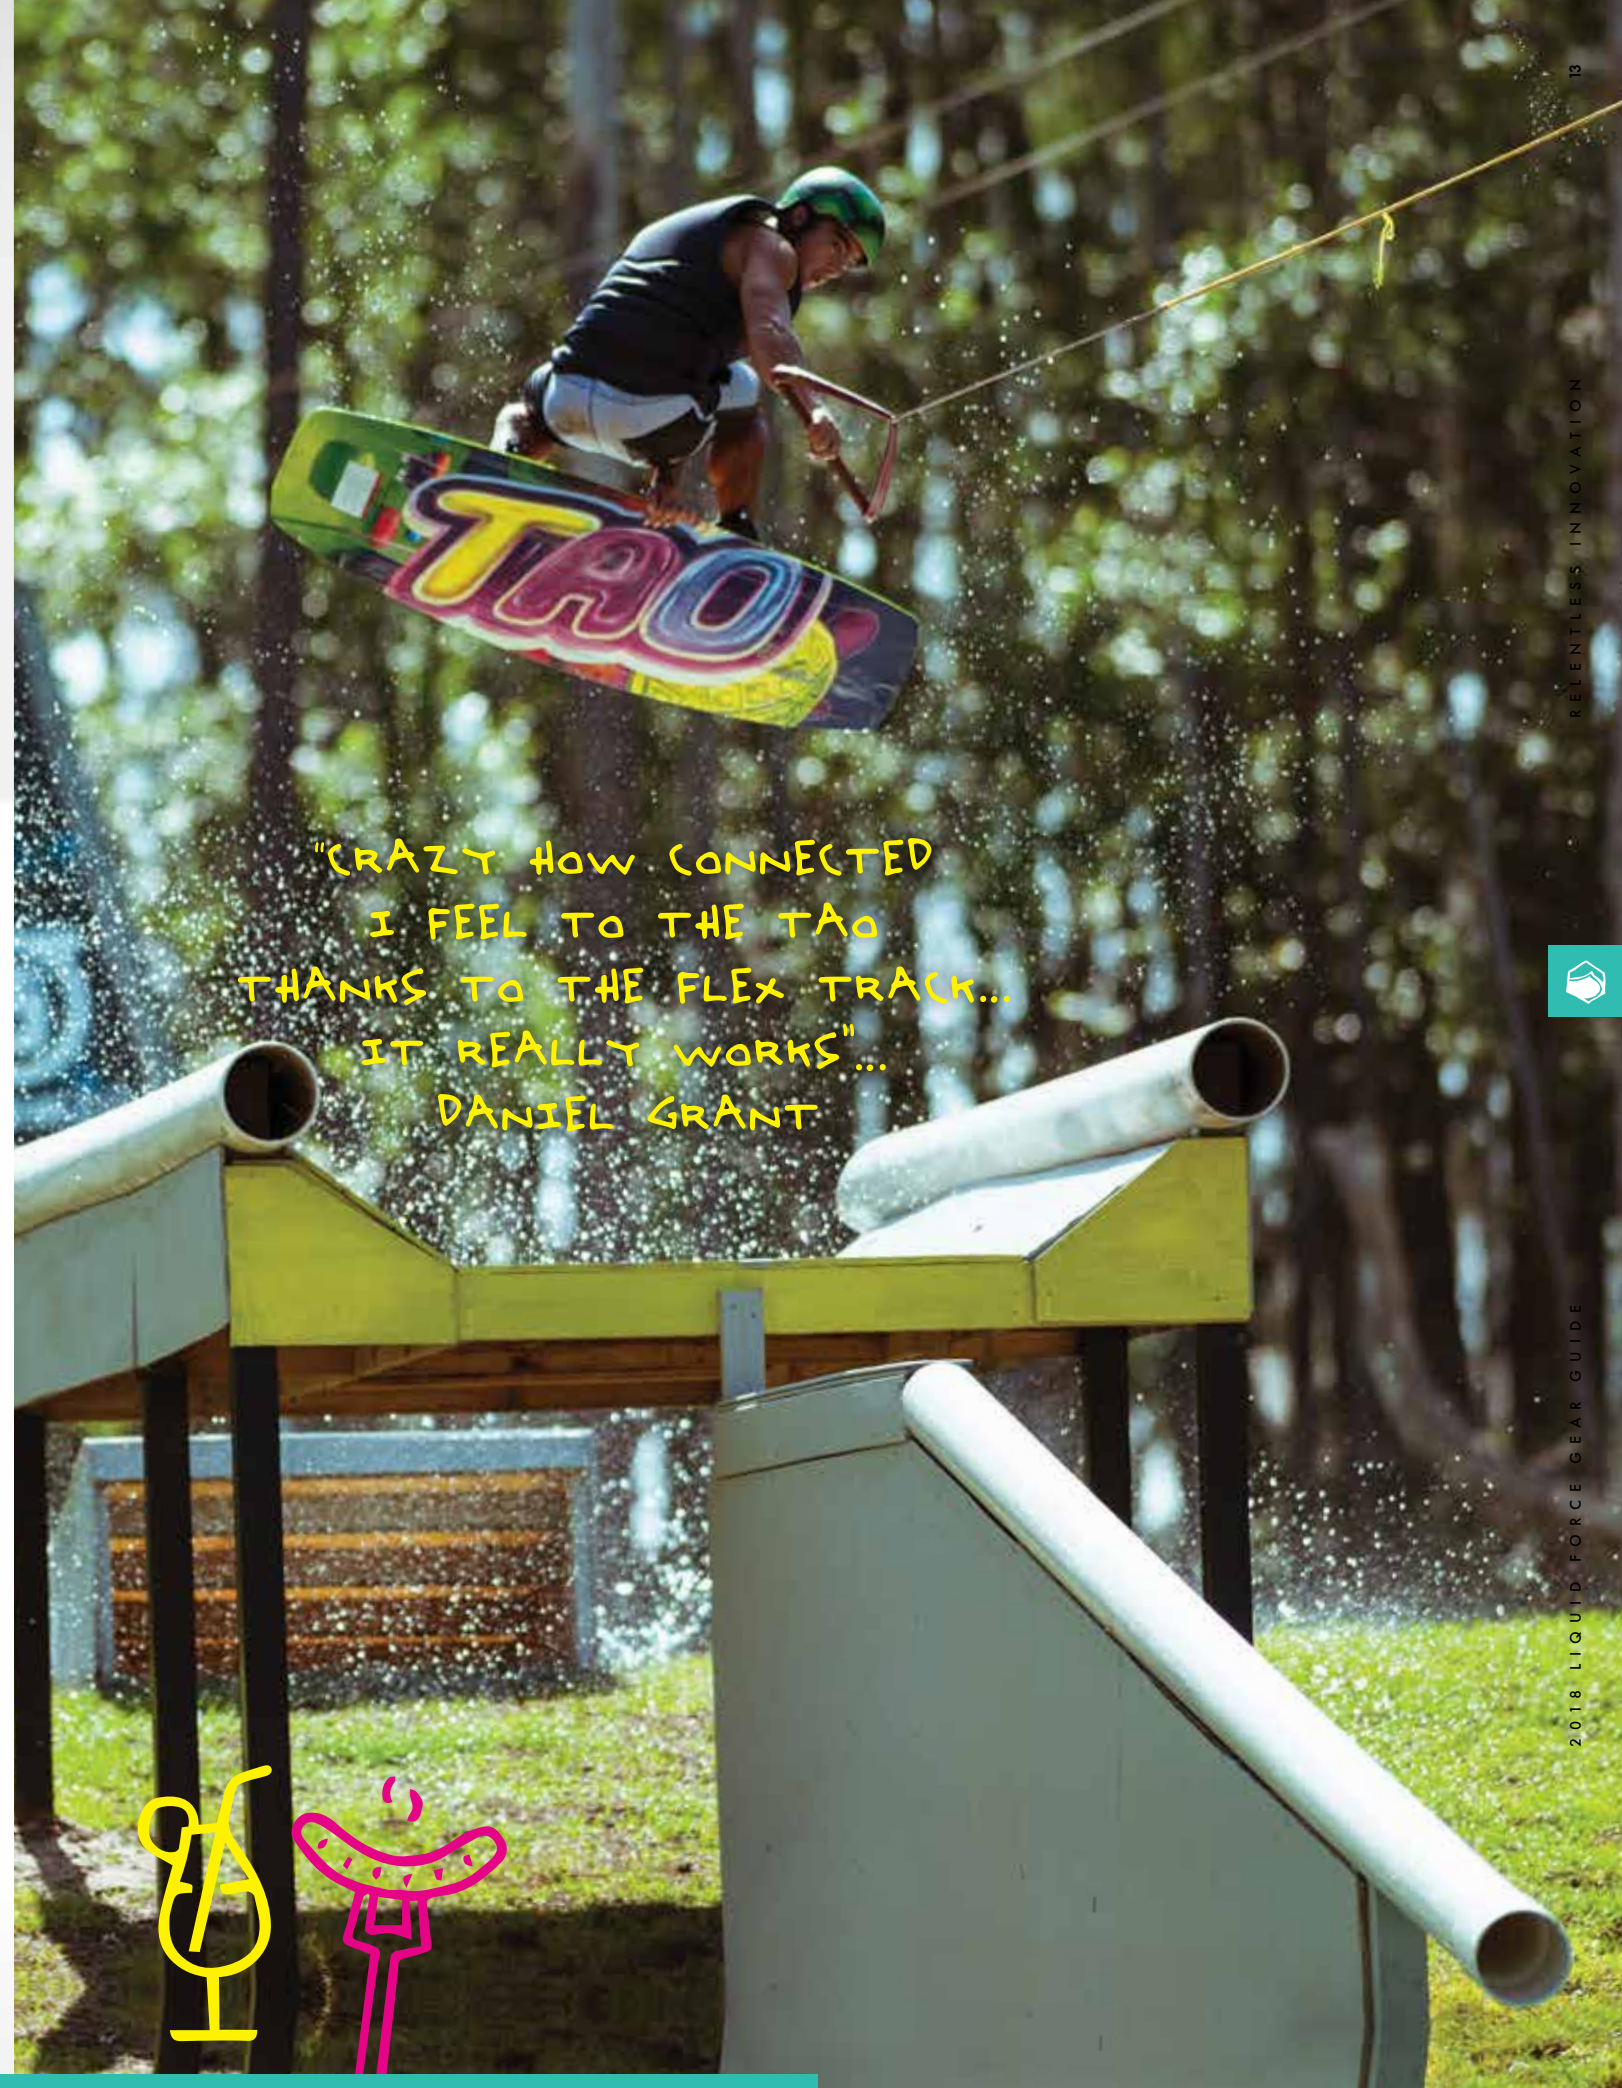

- LF Exclusive Flex Track
- Precision CNC Triple-Stringer Wood/PU Core
- Stepped Deck
- Single Concave Hull w/ Edge Channels through Middle and under Feet
- Concaved Beveled Rail

- Full Wood CNC'd Profiled Core
- Vector Net Base
- Pro Glass Layup
- LF Slider Quad Fin Setup
- Small molded side fins
- LF Exclusive GRIND Base
- LF Exclusive Liquid Rail
- Edge Channels
- Concaved Beveled Rail
- D-I-S-C Hull through the Center
- Triple Concave exiting tail
- Blunted Round Tail
- Aggressive 3 Stage Rocker
- Honeycomb Tip Inserts For Reduced Swing Weight

140 144

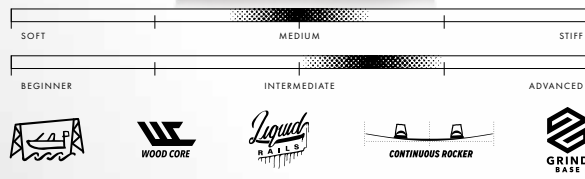

4D Form

"IF YOU'RE A HARD-CORE BOAT RIDER BUT OCCASIONALLY GO RIDE AT THE CABLE PARK, THIS BOARD IS RIGHT FOR YOU!"
-SHAWN WATSON

TIMBA

NEW

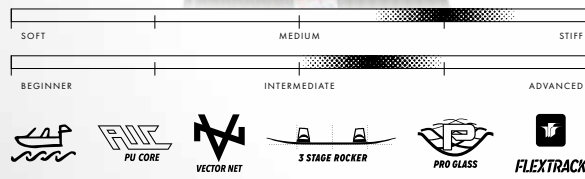

- M6 Inserts
- Full Wood CNC Core
- Radius Liquid Rail Sidewalls
- Triax Glass Layup
- Continuous Rocker
- LF Exclusive Grind Base

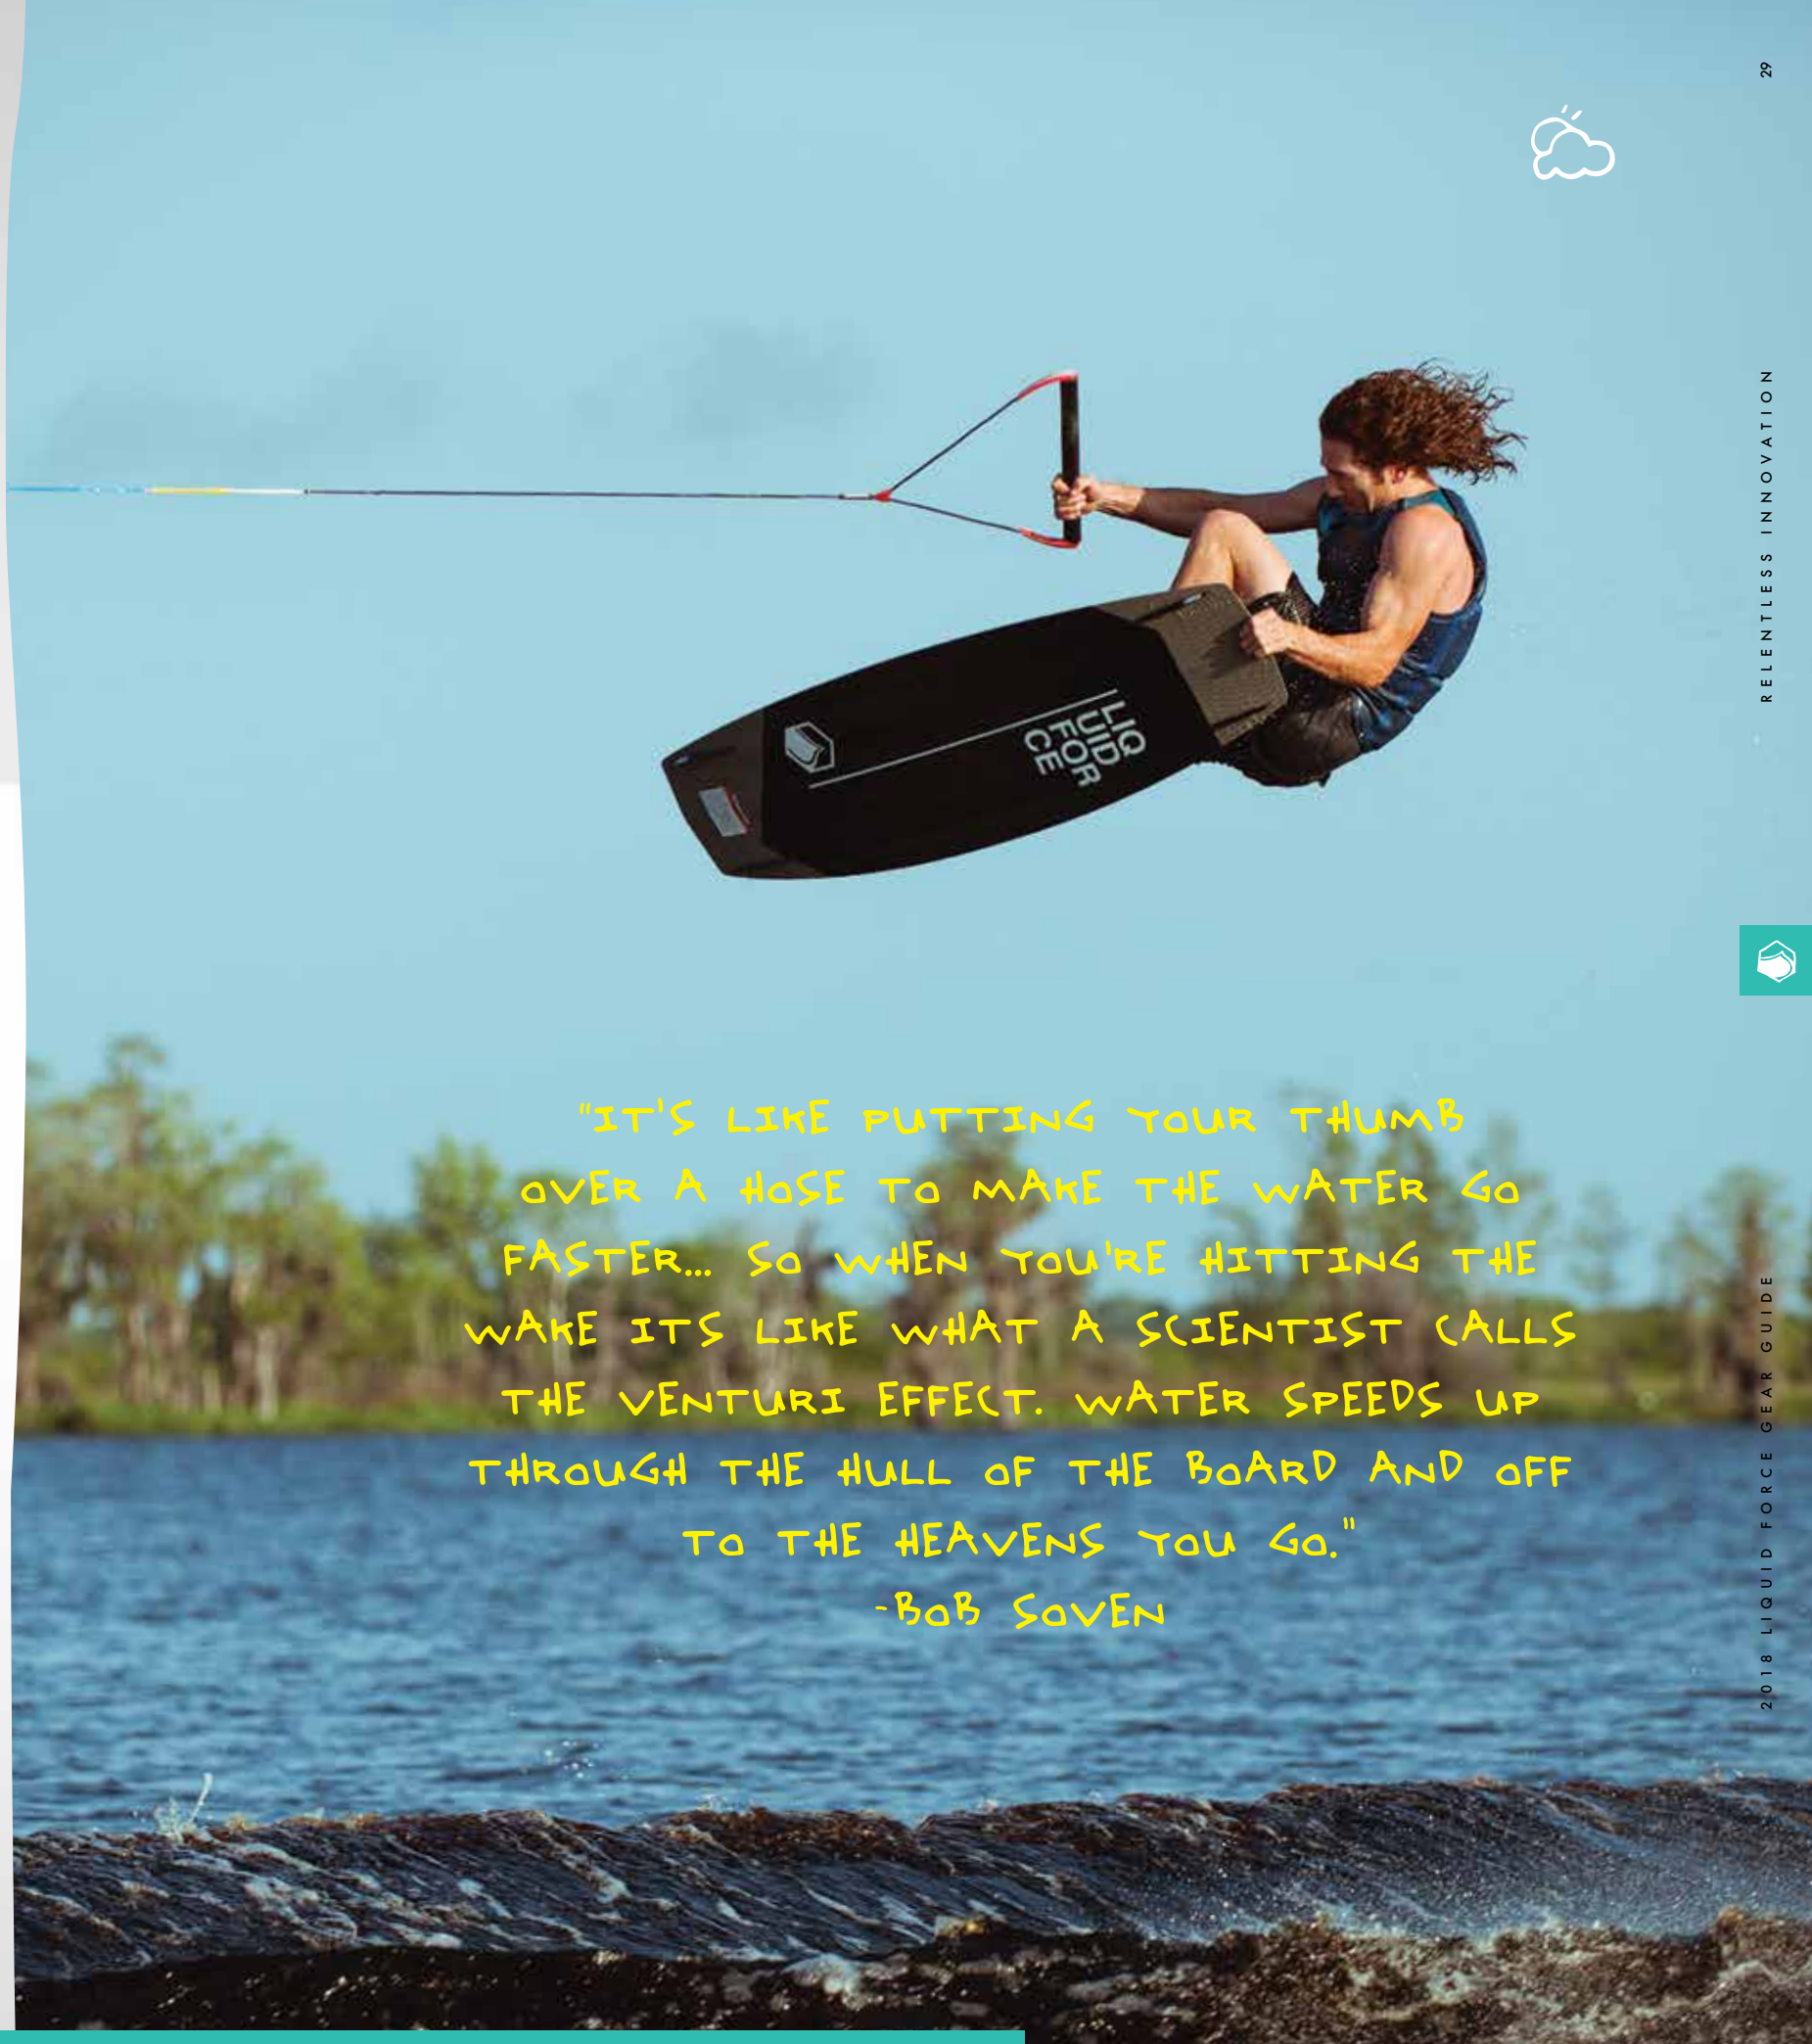

"THIS IS DEFINITELY THE BOARD FOR ME AND ALL THE OTHER CONTINUOUS ROCKER BOARD RIDERS!"
-TOM FOOSHEE

NEXT

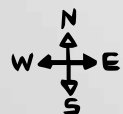

- LF Exclusive Flex Track
- Aggressive Three Stage Rocker
- Vector Net Top & Base
- Single to Double Venturi Hull
- Edge Channels
- Pro-Glass Combo Layout
- RX Quad Fin Setup

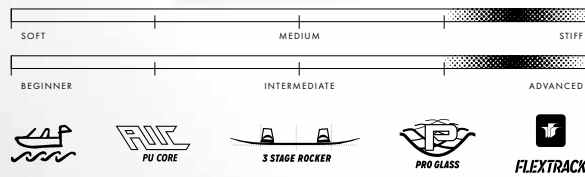

"IT'S LIKE PUTTING YOUR THUMB OVER A HOSE TO MAKE THE WATER GO FASTER... SO WHEN YOU'RE HITTING THE WAKE ITS LIKE WHAT A SCIENTIST CALLS THE VENTURI EFFECT. WATER SPEEDS UP THROUGH THE HULL OF THE BOARD AND OFF TO THE HEAVENS YOU GO."

-BOB SOVEN

REMEDY

- LF Exclusive Flex Track
- Aggressive Three Stage Rocker
- Triple Concave Inside Single Flows Into Venturi Quad Channels

- "Split-Tip" Shape
- Thin Profile Low Volume Rails
- Pro-Glass Combo Layup
- Bladed Rx Quad Fin Setup

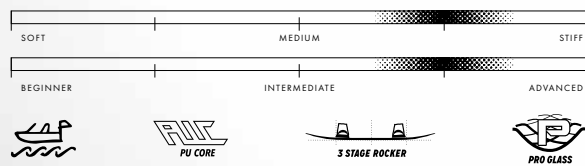

"THERE'S A LOT GOING ON,
A TRIPLE CONCAVE INSIDE A SINGLE
THAT FLOWS INTO A QUAD VENTURI
AT THE TAIL. WHAT'S THAT MEAN?
I DON'T KNOW, I JUST KNOW
THIS BOARD IS FAST"...

-HARLEY CLIFFORD

RDX

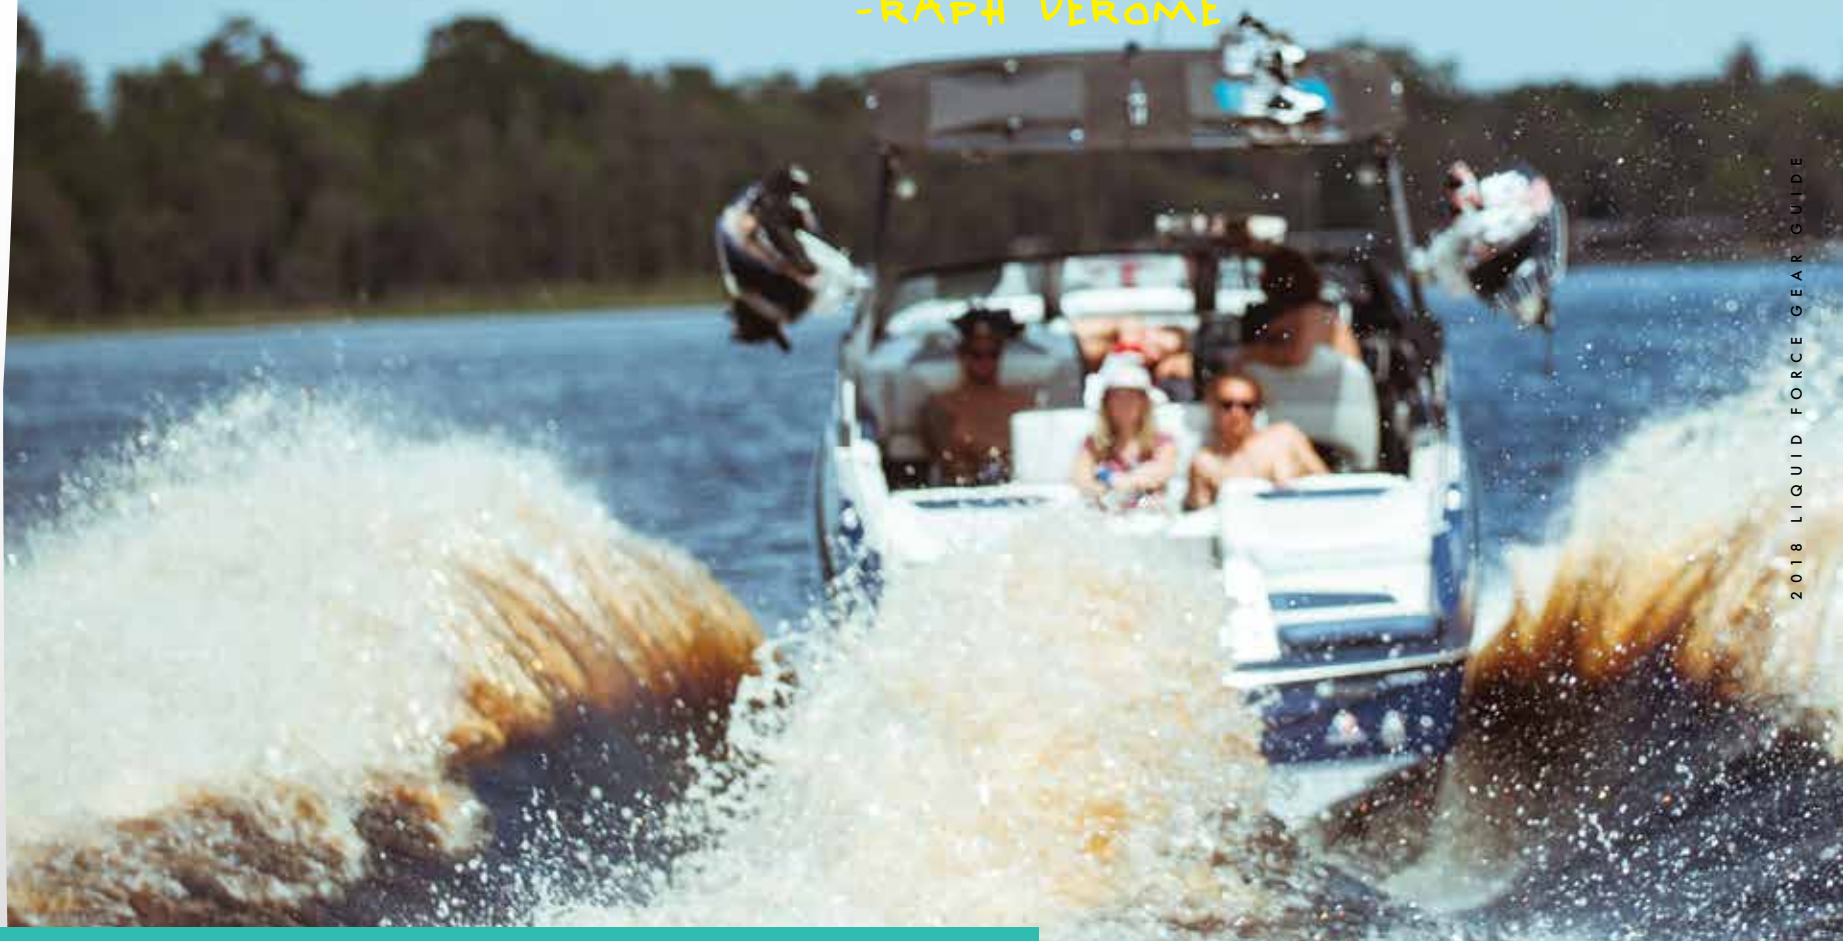

- LF Exclusive Flex Track
- Aggressive, Three Stage Rocker
- D-I-S-C Hull through Center Into Slight V
- Low Volume Rails

- Beveled Edge
- Vee Tip Channel
- Pro-Glass Combo Layout
- Deep Molded In Quad Fins

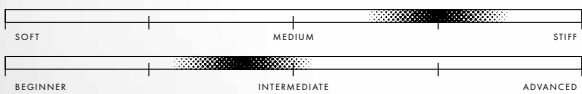

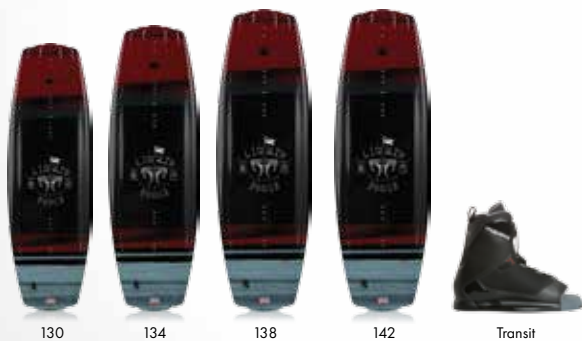

"IF YOU'RE LOOKING FOR A BOARD THAT HAS MASSIVE POP OFF THE WAKE, THIS IS THE RIGHT BOARD FOR YOU"...

-RAPH DEROME

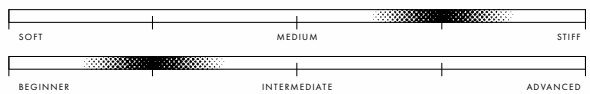

WATSON CLASSIC

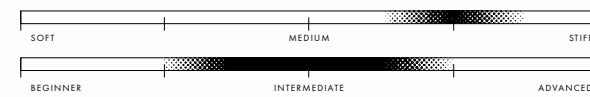

- Progressive, 3-Stage Rocker
- Quad Vented Channels at Tips
- Crisp Molded in Fins
- Spiral "V" With double Concave Mid-Section
- Lifted Variable Edge Rail
- Removable Center Fin

TRIP

- Winged Rail Shape
- Double Concave V-Tail
- Molded In, Warped Long Base Side Fins
- Removable Center Fin
- Continuous Rocker
- D-I-S-C Hull through the Center
- Variable Edge Rail

MAGNUM

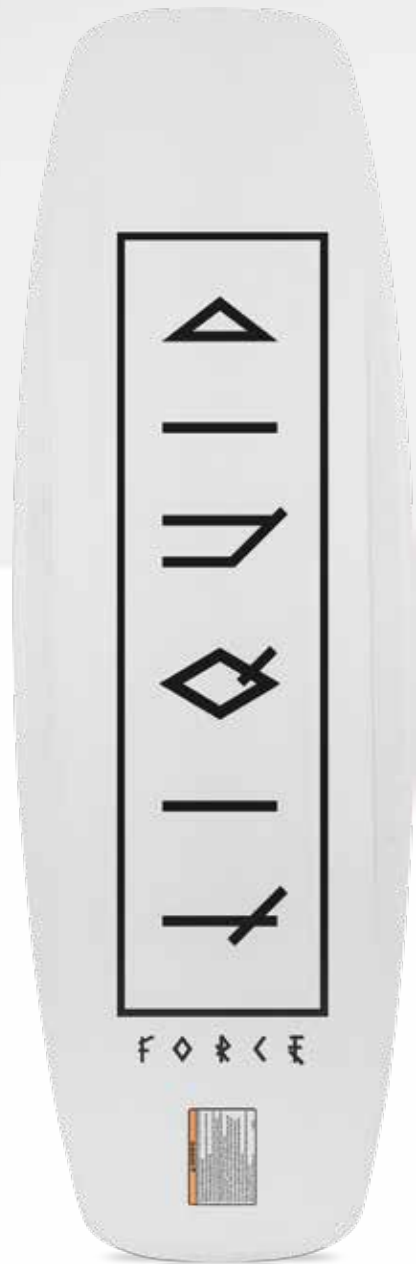

- Directional rocker
- Variable Edge Rail
- Single to Double Concave
- Removable Tri-Fin Setup
- FUN Unlimited
- Tri-Fin Tail w/ Tip Fin at Nose

BINDINGS

BINDINGS

B I N D I N G S

4D BINDING TECH

The smallest footprint in the industry! Smaller footprint allows the board to perform at its truest flex and gives the rider the maximum feeling of response.

Honeycomb FlexFloor absorbs impact, reduces weight of the binding, and provides performance driven flex.

45° angle attachment points located under the riders foot increases leverage, which creates better board response and flex within all directions.

IPX CHASSIS: THE INDUSTRY LEADING 6 IN. SPREAD CHASSIS

DURABLE GLASS FILLED NYLON

SECURE HOLD

2018 LINERS

Your comfort is our top priority! To get you on the water fast, our liners are designed for comfort and are ready to ride out of the box. All of our liners are pre-molded by skilled technicians in our factory, so you don't have to. All Liquid Force liners feature molded rebound foam J-bars for heel hold and integrated foot beds that will not slip out.

COMFORT LINER

Our integrated liner features our softest foam: a great fit for everyone on the boat. This liner provides maximum comfort with just enough support for high-level riders that want a soft flexible binding.

CONTROL LINER

This high-end liner is stable and supportive putting you in complete control. The 2018 models are built with thicker padding for a firmer feel with more rebound energy. The control liner also has a 3D molded Impact EVA bottom featuring 2.5 degrees of cant, toe lift, a deep heel cup and a supportive arch underneath your foot.

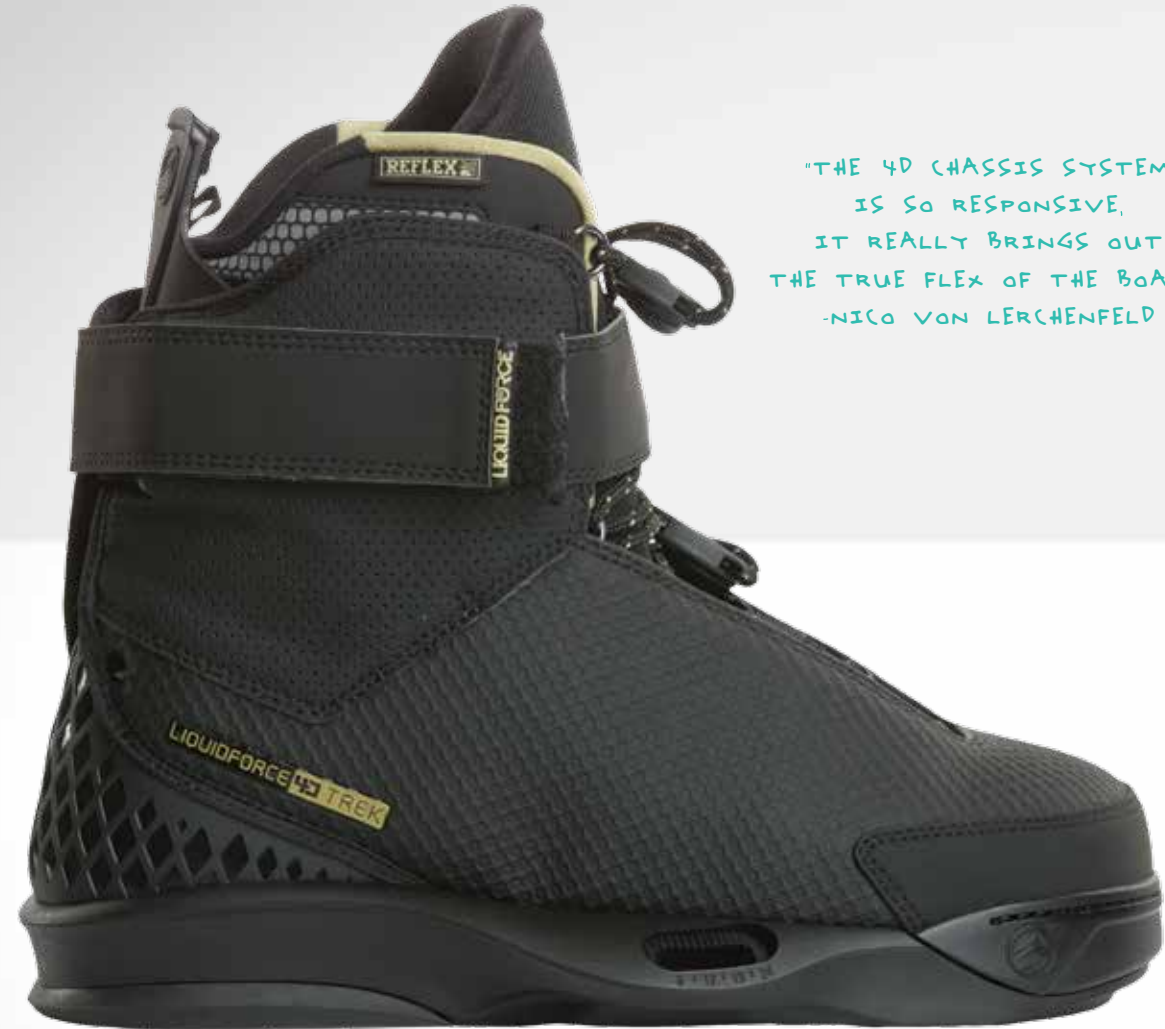

REFLEX LINER

The Reflex features a tongue design that wraps your ankle for a better fit and more supportive flex. The Reflex liner tongue has tapered edges reducing material overlap inside the binding. This feature reduces bulk and eliminates air gaps for a snug, full contact fit. The notched top cuff improves your range of motion and has a better fit for larger calf muscles. The Reflex also has a 3D molded Impact EVA bottom featuring 2.5 degrees of cant, toe lift, a deep heel cup, and a supportive arch underneath your foot.

REFLEX WALK LINER

Our standard Reflex Liner with the addition of a removable and durable Trek Liner Bottom featuring articulated grooves... for comfortable walking and solid traction on all types of terrain.

4D TREK

"THE 4D CHASSIS SYSTEM IS SO RESPONSIVE, IT REALLY BRINGS OUT THE TRUE FLEX OF THE BOARD"

BALLAST

For 2018, SUMO is back with our innovative Max Flow System. Together, the updated SUMO Max Flow Pump and SUMO Max Ballast Bags make SUMO the fastest filling ballast system in the industry! Equipping your boat with the system equals less time filling and more time riding your massive wake! All of our SUMO Sacs are easy to use, durable and convenient. They are designed to work as a plug 'n play option with your factory ballast system or on deck with our SUMO pumps. We offer an extensive selection of ballast to fit any boat or budget.

SUMO MAX FLOW LINK™ VALVE

Our new SUMO MAX FLOW valve is a new 1 1/2 IN. diameter high flow version of the Sumo LINK™ system. The SUMO Max Flow valve provides the same hassle free watertight connection to your Sumo Pump but with massive 50% LARGER intake. The Sumo Max system is 100% compatible with the classic Sumo and Big Bag ballast systems.

SUMO SKIN FABRIC

SUMO Sacs are made with our own flexible and puncture-resistant fabric, "SUMO Skin." It has a durable 1000D polyester core that is heat laminated to lightweight Polymer skins with a bonding agent. This sandwich construction is 150% stronger in tearing tests and 37% higher in tensile strength than our competitors, making it the most durable ballast bag available.

SUMO SEAMS

Every SUMO sac is double welded to ensure a watertight seal. Our tough SUMO Skin is overlapped and hot air welded. You can see the smooth and clean seams on the outside of every bag, and a second welding operation applies an inch wide sealing tape to the inside of every seam.

1" NPT VALVES

Our NEW easy turning cap with a perfect water tight seal that is pressure tested up to 6 PSI. Our 1" NPT ports allow built in ballast systems to fill, as well as drain and vent quickly for hassle free operation.

SUMO SACS

Huge variety of bags to fit every boat!
Plug 'n play in stealth!

SUMO MAX FLOW LINK™ VALVE

Our new Sumo Max Flow Valve is a new 1.5" diameter high flow valve. The Sumo Max System is 100% compatible with the classic Sumo and Big Bag Ballast systems.

SUMO SKIN FABRIC

A durable 1000D polyester core bonded to water tight, light-weight Polymer skins. This three layer sandwich construction makes Sumo Ballast the most durable ballast bag available.

DUAL WELDED SEAMS

Every Sumo Sac is double welded to ensure a watertight seal. Our tough Sumo Skin is overlapped and hot air welded then a second welding operation applies an inch wide sealing tape to the inside of every seam.

1" NPT VALVES

Our NEW easy turning cap with a perfect water tight seal that is pressure tested up to 6 PSI. Our 1" NPT ports allow built in ballast systems to fill, as well as drain and vent quickly for hassle free operation.

SUMO SACS

Huge variety of bags to fit every boat!
Plug 'n play!

SUMO MAX FLOW PUMP

Fully submersable pump fills 200 pounds in only 60 seconds!

SUPER SUMO PUMP

Fully submersable pump fills 120 pounds in only 60 seconds!

SUPER SUMO PUMP

Fully submersable pump fills 100 pounds in only 60 seconds!

SUMO LINK™ VALVE

Our Unique Link System provides a hassle free connection to your Sumo pump, keeping your boat dry on the inside.

1" NPT VALVES

Our NEW easy turning cap with a perfect water tight seal that is pressure tested up to 6 PSI. Our 1" NPT ports allow built in ballast systems to fill, as well as drain and vent quickly for hassle free operation.
