

Feel the Pork

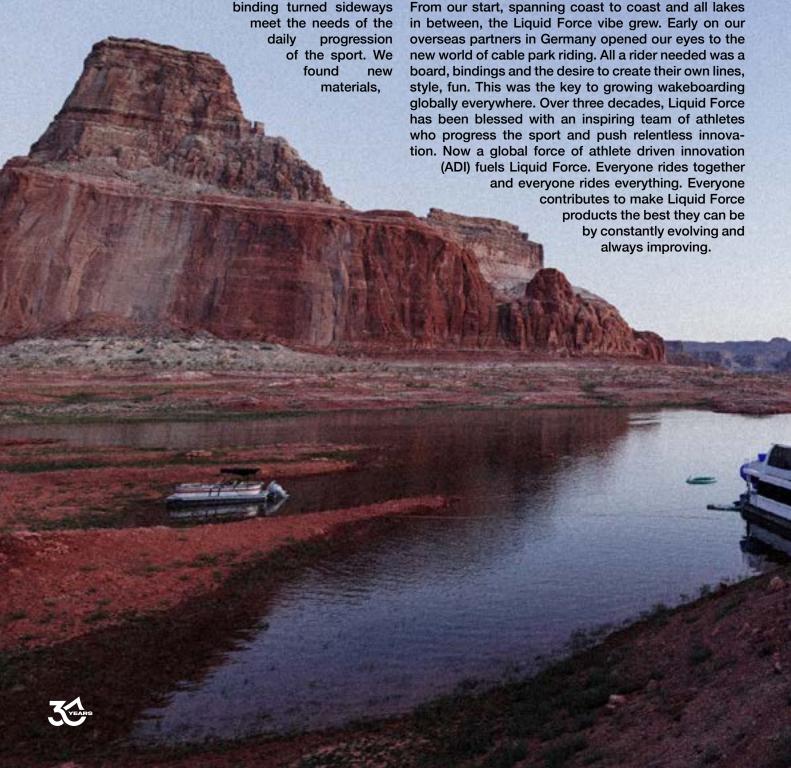

Some 30 years ago on a dream and a dare, Liquid Force was born. Driven by passion, stoke, and the endless pursuit of fun, we created more than a company. LF became a lifestyle - a way of living sideways. Our pursuit of relentless innovation led to never ending and always expanding fun on the water.

At first the focus was simple - make better boards. Season after season, our team of creative riders made that task easy and productive. Next came the need for better bindings.

No longer would a water ski binding turned sideways

new manufacturing techniques, and completely new designs to evolve the rider - board interface into what it is today. As the wakes got bigger and better, we started surfing behind our boats, and off we went on another path of relentless innovation leading us back to our roots. Then we wakeskated, and our LF riders showed us what they needed to take things to the next level and beyond. And then we started foiling. We all got to become groms again while learning together that the stoke never ends.

This year's photoshoots started with Daniel Grant hosting us at his home park. To think that one of the most influential riders in the sport grew up riding in Thailand without access to a boat just shows you how far we've come in this time. It's beautiful and it's amazing. We've become a global Liquid Force. Returning to Florida, we weren't on wakeboards, but wakesurfers and foils. One session ended with a squadron of five foilers riding in a line behind one boat. A flotilla followed while cheering us on, the stoke is contagious. Then we went back to Lake Powell. This special place has provided the backdrop for some of the most iconic images of our sport. To return with our new team being documented by some LF OGs was magic. Again, everyone was riding everything - learning, laughing, and progressing together.

This season's lineup is the culmination of three decades of relentless innovation: new park boards, a magic boat board for everyone, a growing line wakesurfers, and an evolving line of foils that let you ride behind anything at any time. Thanks for joining and feeling the pull that is Liquid Force.

Jimmy Redmon Founder

GAVIN STUCKEY'S NEW GRAIL PARK BOARD

RIVERS HEDRICK'S NEW CURRENT PARK BOARD

Gavin Stuckey Driven Innovation | The search is over—Gavin's found the Grail.

Sizes: **143 / 148 / 153** 

GRAIL

Engineered for power, rebound, and charging hard, the Grail is a high-performance park board inspired by the next-gen flow of Gavin Stuckey. Through our ADI program, Jimmy and Gavin created his very own masterpiece tailored for Gav's park dominance. With a stiff center, softer flexing tips, and channels that follow the rail, the Grail looks like no other LF board in the line.

#### Features

- Engineered Flex CNC'd Core
  - Flat to Single Concave Hull
- Curved Edge Channels
- Liquid Rail
- 3 Stage Rocker Lower Exit Angle
- CNC Flex Zones

#### Product Specs

LENGTH	WIDTH	AREA	ROCKER	WEIGHT RANGE
cm	in	in	in	lbs
143	16.7	842	2.6	120-190
148	16.9	884	2.7	150-210
153	17.1	925	2.8	170-230+

# CNC DECK

Recessed flex zones in the tip and tail reduce weight and increase responsiveness. Includes a grab rail at Gavin's request.

# **AGGRESSIVE ANGLED RAIL**

Dig deep and grip harder on your carve. Channels follow the rail of the board.

# FLAT TO SINGLE CONCAVE HULL & CURVED CHANNELS

CNC'd and simplified for easy rail release and better slide. The flat midsection blends into a single concave for locking in on rails.

#### **FLEXTRACK**

 $Optimized \ board \ flex \ with \ Liquid \ Force \ 4D \ Bindings. \ Compatible \ with \ all \ wakeboard \ bindings.$

# PERFECT PAIRING

Aero 6X™ Binding Aspect 6X™ Binding

The Illusion is everything Matty Muncey needs to turn a rail jam into a spectacle. Matty has been associated with the Illusion since day one—this year it's official! Jimmy worked with Matty to make his signature board, a more refined version of the Illusion. Packed with a new, elongated Just the Tip tech zone for locked-in presses that rolls into a new rocker profile, the board also features a toneddown lifted rail for a less grippy feel on the surface. Matty's unique riding demands a board that stays reactive through every press without slipping when he pushes the limits.

#### Features

	153	17.2	903	2.9	170-230+	

# JUST THE TIP

By removing material from the tip and tail of the boards core we reduce weight and improve response. On the water that means free, easy spins thanks to the reduced swing weight and cleaner, higher ollies thanks to the weight saving

#### **WOOD CORE**

Using profiled paulownia wood from tip to tail for trusted stability and strength. All LF profiled cores are designed to give a solid feel between the feet and flexing on the tip and tail. As the core profiles towards the tip and tail the profile thins out to create more flex.

#### **ROCKER**

ON THE PEAK

Sizes: 137 / 142 / 147 / 152

CURRENT Rivers Hedrick Driven Innovation

The newly crowned 3-peat LAO champ has been turning heads for a while, so when we decided to make a high-end park board, we naturally wanted to work with Rivers. With help from Jimmy and our ADI program, Rivers went through more prototypes than anyone to date, but the result is awesome! The Current is responsive underfoot and pressable through the tip thanks to a CNC'd topsheet. CNC'd structure left in the deck keeps it poppy and responsive while maintaining flex for every press.

- CNC'd Wood Core
- Flat to Single Concave Hull
- **Speed Rails**

- **Curved Channels for Better Slide**
- 4D™/6X™ Compatible
- **Grind Base**

#### **Product Specs**

LENGTH	WIDTH	AREA	ROCKER	WEIGHT RANGE
cm	in	in	in	lbs
137	16.4	797	2.5	70-140
142	16.7	837	2.6	90-160
147	16.9	879	2.7	120-200

#### TIP DEPRESSION

By removing material at the tips it acheives a couple key features that Rivers was striving for. One of those features is a solid tip flex that allows for deep presses maximizing flex at the tips. The other feature being removing weight from the tips in which allows for less swing weight while in the air.

#### **CURVED CHANNELS**

By adjusting the channels on the bottom of the board it allows for a more fluid and smooth experience while sliding rails and boosting off of kickers. Its a new innovation that transitions the thought of a wakeboard through improving performance on the water as well as on features at the park.

#### **WOOD CORE**

Using profiled paulownia wood from tip to tail for trusted stability and strength. All LF profiled cores are designed to give a solid feel between the feet and flexing on the tip and tail. As the core profiles towards the tip and tail the profile thins out to create more flex.

#### ROCKER

Hybrid 3-Stage

# PERFECT PAIRING

Peak 4D™ Binding Hook 6X™ Binding

**BSP**Felix Georgii Driven Innovation | Flex with finesse. Press with purpose. Sizes: 144 / 148 / 152

The Butterstick Pro is pure Felix. A shape that reflects his unmatched creativity, pressed-out style, and unexpected approaches to every rail. Tuned to flex smoothly while still snapping back under pressure, it's soft where it should be and strong where it counts. This board's updated narrow waist and sleeker rail profile make it super playful without sacrificing control. Felix's custom-tuned rocker gives it a skatey feel, and the grind base and Liquid Rails keep it bombproof session after session. This is your license to let loose.

#### Features

- Super Flex Profiled Core
- Grind Base

Speed Rail

- Liquid Rail
- Single Concave Hull
- 4D™/6X™ Compatible

#### **Product Specs**

LENGTH	WIDTH	AREA	ROCKER	WEIGHT RANGE
cm	in	in	in	lbs
144	16.8	839	2.8	120-190
148	17	881	2.9	150-200
152	17.3	918	2.9	170-230+

#### SPEED RAIL

The redesigned rail section of the BS Pro reduces the overall weight all the while making the board ride faster when on rail and cut cleaner through the water

# **FLEXTRACK**

Giving the board a better, cleaner flex through the mounting points make the board flex true to its design. Also gives additional stance options compared to a board with regular inserts.

#### **WOOD CORE**

Using profiled paulownia wood from tip to tail for trusted stability and strength. All LF profiled cores are designed to give a solid feel between the feet and flexing on the tip and tail. As the core profiles towards the tip and tail the profile thins out to create more flex.

#### **PERFECT PAIRING**

Hook 4D™ Binding Hook 6X™ Binding

**TAO** Daniel Grant Driven Innovation Sizes: **145 / 150 / 155** 

The Tao charges hard just like Daniel! Built to go big while still being able to flex out any nose press thanks to the Hotbox technology. We CNC the top of the core to make the raised wakeskate centre of the board, this gives stiffness underfoot so you can go big while allowing the tips to flex where you need it. Daniel wanted to keep it simple on the base with minimal channeling to keep things hang up free on features, while still being fast on the water.

#### Features

- Engineered Flex CNC'd Core
- Single Concave w/ Tip Channels
- **Hotbox Technology**

# Athlete Driven Innovation

- Stepped Deck Technology
- 6X™/6R™ Compatible

# **Product Specs**

LENGTH	WIDTH	AREA	ROCKER	WEIGHT RANGE
cm	in	in	in	lbs
145	17.1	857	2.7	120-190
150	17.2	889	2.8	150-200
155	17.3	921	2.9	170-230+

#### LOOSE & LOCKED IN

Simple and smooth single concave running through the center of the board to concave with edge  $\frac{1}{2}$ channels at the tips.

# HOTBOX TECHNOLOGY

The lowered center "wakeskate" allows you to sink into the board for a more direct feel while the thickened rail keeps everything strong. Where your bindings mount, there is a mellow cant to the board that sits 2-3mm lower than the top sheet, creaiting an unreal planted feeling.

#### **WOOD CORE**

Using profiled paulownia wood from tip to tail for trusted stability and strength. All LF profiled cores are designed to give a solid feel between the feet and flexing on the tip and tail. As the core profiles towards the tip and tail the profile thins out to create more flex.

# A SERIES OF BOARDS FOR THE FUTURE OF WAKE

The Future is here... Kids are undoubtedly the future of wakeboarding, bringing fresh energy, creativity, and enthusiasm to the sport. As young riders take to the water, they learn technical skills and develop a lifelong passion for wakeboarding. These young wakeboarders will push boundaries, innovate new tricks, and inspire future generations.

At LF, we know that kids want to ride what their moms, dads, and older siblings ride—not just a kiddie graphic. That's why we design true-sized boards for kids, packed with the same tech as our adult models, but with more fun! Our kid-friendly wakeboards are lightweight, with softer flex patterns and smaller sizes to accommodate younger riders.

By providing young wakeboarders with the right equipment, we can help them reach their full potential and become the next wave of wakeboarding legends. Let's keep the sport vibrant and exciting by nurturing the talents of these future stars.

# PEAK 4D™

Nico Von Lerchenfeld Driven Innovation Sizes: 4-6 / 6-8 / 8-9 / 9-10 / 10-11 / 11-12 Color: Tan/Grey

Nico expects a perfect fit and instant response from his gear, and the Peak 4D is built to deliver exactly that. The outer shell uses Keyhole Tech to lock in your ankle securely while keeping the laces outof the way when putting your foot in. The Trek Terra walk liner brings next-level comfort and ease, with a slimmed-down build that slips on effortlessly and supports you all session long. New for 26 these now feature a lace up design with thicker laces and improved profile to prevent snagging. Pair with Nicos Peak board for the ultimate Nico experience.

Perfectly Paired with the Peak Wakeboard

- 4D™ Chassis System
  - Medium to Wide Fit
- Soft to Medium Flex
- **Upper Speed Hook Lacing**
- Dual Zone Lacing w/ Locks
- **New Trek Terra Liner**

#### TREK TERRA LINER

The walk-out liner bottom has a lightweight sole with durable rubber traction pods and built in drainage system, This liner gives you the dependability whether waking on concrete, gravel, or dirt.

# **FLEXFLOOR**

4D™ chassis exclusive honeycomb FlexFloor absorbs high impact landings and returns energy creating a more responsive feel.

#### 4D™ CHASSIS

The #1 choice of the worlds top cable riders! The Liquid Force  $4D^{\text{\tiny{IM}}}$  chassis delivers a precise, responsive ride like no other binding system. The manta ray inspired wing design gives strength while also reducing the footprint of the binding. The reduced footprint allows the board to be ultra responsive with deadspace beneath the binding that otherwise wouldn't flex. Paired with the Liquid Force Flextrack™, the 4D™ system bindings are the ultimate ride for cable riders of any ability.

# **FLEX**

# WALK HOOK 4D™

Felix Georgii Driven Innovation

Sizes: 8-9 / 9-10 / 10-11 / 11-12 / 12-13+ Color: Black

The Hook 4D is packed with features that matter most to Felix and riders like you. The reworked three-strap closure system now includes customizable fit straps and a reinforced ankle harness to keep you secure. The all-new Trek Terra walk liner brings new lace up design and improve front boot profile to make getting in and out quicker and easier. The Hook 4D is supportive with a nice flex and firm favorite with our park team.

# AERO 6XTM

Harley Clifford Driven Innovation

Sizes: 4-6 / 6-8 / 8-9 / 9-10 / 10-11 / 11-12 / 12-13+ Color: White

Push your riding to the edge with the lightest bindings on the market. Weighing in at just 4lbs, the AERO  $6X^{\text{m}}$  is the peak of performance-driven wake footwear — designed for LF icon Harley Clifford, and built for riders chasing top-tier tech. The upper uses precision laser-cut materials with carbon reinforcement, eliminating excess weight and stitching found in standard bindings. That means less bulk, more airtime, and bigger tricks into the flats — don't be surprised if the boat erupts when you stomp your next landing.

#### Features

Perfectly Paired with the Aero Remedy Wakeboard

- 6X™ Chassis System
- Medium to Narrow Fit
- Medium Flex

- Perrectly Paired with the Aero Remeay Waker
- Dual Lace Closures
- Laser Cut & Sonic Welded Upper
- Lightweight Reflex Liner

# FLEXFLOOR

The exclusive honeycomb FlexFloor absorbs high impact landings and returns energy creating a more responsive feel.

# **6X™ CHASSIS**

The  $6X^m$  Chassis is the foundation for lightweight, comfortable, and responsive bindings for Boat and Cable riders alike. Delivering similar dampening performance of our 4D binding technology but in a universally compatible  $6^*$  chassis.

# ™Ë TERRA 6X™

The most versatile Park boot, for anyone and everyone! Sizes: 4-6 / 6-8 / 8-9 / 9-10 / 10-11 / 11-12 Color: Black/White

The Terra 6X is our most versatile binding yet, equipped with Trek Terra walk liners so you can hike back to the start dock without collecting a trail of thorns and gravel. A dual-zone lacing system lets you independently tighten the upper and lower zones for a fully customized fit. With a medium-to-firm flex, the Terra gives you enough mobility for tweaks, but still packs the support you need for heavy landings and sending it deep.

#### Features

Perfectly Paired with the Tao Wakeboard

#### **FLEXFLOOR**

The exclusive honeycomb FlexFloor absorbs high impact landings and returns energy creating a more responsive feel.  $\frac{1}{2} \left( \frac{1}{2} - \frac{1}{2} \right) = \frac{1}{2} \left( \frac{1}{2} - \frac{1$ 

#### **6X™ CHASSIS**

The  $6X^m$  Chassis is the foundation for lightweight, comfortable, and responsive bindings for Boat and Cable riders alike. Delivering similar dampening performance of our 4D binding technology but in a universally compatible  $6^n$  chassis.

# **FLEX**

# VERTEX 6X™

Innovation and Design focused on Rider Progression behind the Boat!
Sizes: 6-8 / 8-9 / 9-10 / 10-11 / 11-12 / 12-13 Color: Black

The Vertex  $6X^{\mathbb{M}}$  is all about power, progression, and dialed-in support — made for riders charging behind the boat and pushing their limits every set. Built with performance in mind, the Vertex brings in high-end features from our top-tier bindings, but keeps things light and nimble with a soft-to-medium flex profile. It's supportive when you're loading up for a heavy wake hit, and forgiving enough to let your style breathe when you're laying it out in the flats. What really sets the Vertex apart is its liner — specifically designed to pair with the styling and feel of the Ethos board. This combo not only looks right, it rides right — giving you a unified setup that flows from your feet to the wake.

#### Features

Perfectly Paired with the Ethos Wakeboard

Featuring our rock solid 6R™ Chassis and our rider approved Comfort Liner, there isn't a better pair of bindings on the market to slip your feet into as you embark on your Wakeboarding career! Whether it's your first set behind the boat or you're already comfortable carving around, the Index should be your foundation to grow upon. Its dual lace zone closure allows you customize exactly how your bindings hold you in place across the bridge of your foot and around your lower shin. And, with three sizing options that span across a wide of shoe sizes, you'll be able to accommodate more than one rider if this will be shared amongst a group or family! A great way for the family to share a "setup".

#### **Features**

- **Dual Zone Lacing**
- **Elastic Fit**
- Impact EVA Footbed
- **Comfort Liner**
- Upper Cuff FlexZone

# PLUSH 6R™

Ideal for any newcomer looking for the perfect blend of comfort and stability out of her bindings!

Sizes: W4-7 / W7-10 Color: White/Lilac

The Plush's design guarantees a reliable and cozy fit that you can depend on every time you hit the water. The dual lace closure and stretch zones at the cuff give riders a perfect fit, specific to the contours of her feet and ankles. The Plush is great choice for entry level female riders, as well as seasoned wakeboarders looking to enjoy a more laid-back session too! Now, it's time to lace up and hit the water with confidence!

Upper Cuff FlexZone

# RANT 6RTM

Though the Rant 6R may be tiny, it is mighty! Sizes: 12T-5Y / 4-6 Color: Black

Designed specifically for younger "Future Series" riders looking to get out there and have a blast. Give your Grom all the comfort and support they need to have fun out on the water with a pair of Rant 6R bindings. Whether they're ripping behind the boat or putting in laps at the cable park, this is the binding for them!

# DREAM 6R™

Built to give your little wake princess the comfort and stability she needs to get out there and pursue her Dreams!

Sizes: 12T-5Y Color: White/Sky

The Dream 6R's Comfort Liner and Impact EVA footbed pair nicely providing a soft and comfortable platform for little feet to enjoy. Allowing for more time on the water with less foot fatigue. The open-toe design allows for plenty of growing room or the ability to share between siblings and friends...so nothing but smiles ahead. Help make your little gromette's "dreams" come true with a fresh pair this season, and watch her have an epic time out on the water building her confidence behind the boat or at the park.

#### Features

# THESATE

TRIED AND TRUE

# TAO SKATE

Hey, yo' DJ...bring that beat back!! Sizes: **39" / 41"** 

Everything you've come to know and love about Dan's high-performance Wakeskate wrapped up with a fresh graphic is back again for 2026!

The TAO Skate's is known throughout the Wakeskating community for its perfectly dialed weight. Whether out in the flats, coming off a rail, or even a boost off a kickers...your skate will stay with you. Helping you dial in those flip tricks and shuv-its with less spills!

Its contoured 3D molded top-sheet will feel like your favorite skateboard...

Daniel made sure you have everything you need to charge it to the fullest.

And, to push things even further the TAO Skate comes with pre-drilled pilot holes so you can mount up a pair of LF Nub Skate Fins to work on those nose slides or blunt slides on your favorite rail or ledge. Grab a pair of those along with your new TAO Skate for an epic session.

#### Features

- Nub Zones
  - Hybrid Construction
- Grind Base
- Black Grip Tape
- Deep Concave Deck
- 1.125" Obscura Fins

# **FOCUS SKATE**

Grab a Focus and let the good times begin! Sizes: **42" / 44"** 

The Focus is purely focused on progression. From your first set on a skate, to stomping your first shuv-it, and beyond...the focus will do just that, let you focus on fine tuning your bag of tricks. The EVA Deck Pad gives riders of all abilities a solid platform to ride on...with or without shoes, even though we suggest you wear some to protect those toes!

Whether you ride behind a boat or are stacking laps your local cable park, the Focus Wakeskate is everything you need to kickstart your Wakeskate career!

#### Features

- Single Concave Hull
- Dual 1.0 Skate Fins
- Symmetrical Profile
- EVA Deck Traction
- 9-Ply Wood Construction
- Progressive 3-Stage Rocker

**SPEED AND PERFORMANCE** 

# **TWIN TURBO**

The Perfect Blend of Precision and Performance, for Top-Tier Wakesurfing!your next comp! Sizes: 4-2 / 4-6 / 4-10

Give yourself the competitive edge this season with the 2026 Twin Turbo, engineered to dominate endless waves and redefine high-performance wakesurfing. Designed for those who demands precision and power, the Twin Turbo is your weapon to link tricks seamlessly and unleash explosive power off the lip!

#### Features

- Hand-Glassed Construction
- Single Concave Hull
- EPS Foam Core w/ Wood Stringer
- Crisp Rails
- Carbon Tape Reinforcement
- Twin Fin

#### Product Specs

LENGTH	WIDTH	THICKNESS	ROCKER	VOLUME	FINS	WEIGHT RANGE
in	in	in	in	liter		lbs
4-2	19.4	1.3	2.7"N / .49"T	16.5L	(2) Surf 3.4	Up to 140
4-6	19.6	1.4	2.8"N / .53"T	20.5L	(2) Surf 3.7	130-200
4-10	20	1.5	2.9"N / .57"T	22.3L	(2) Surf 4.0	190-240

#### FORWARD MOUNTED TWIN FINS

Allow the Twin Turbo to break free faster and easier at the top of the wave, for the perfect cutback!

# HIGH PERFORMANCE EVA PADS

Our EVA Traction received a full makeover! Updated with square grooving and a micro-dot textured finish, our new traction pads are even easier on your feet without sacrificing an ounce of performance.

#### ARCH BARS

Redesigned arch bars for both your front and rear foot provide a nice landing pad for your feet when coming down from airs, or help you keep proper foot/body alignment on the board while throwing a meaty slash!

# DRIVE

Your All-In-One, Ticket to Fun! Sizes: 4-4 / 4-8 / 5-0 / 5-4

Do you appreciate craftsmanship and won't settle for anything less than a good time? Who are we kidding, of course you do...that's why you're reading this. The Quattro Quad was made just for you! Since its debut, the Quattro has been the undisputed champion of fun in the LF Surf line, winning over riders the moment they settled into the pocket. If you were hooked on the POD or Space POD in years past, the Quattro is the must-have evolution to add to your quiver. Its refined V-Tail, paired with a rounded nose, delivers buttery-smooth bottom turns and explosive cutbacks off the lip. Strategically added volume ensures rock-solid stability underfoot, giving you all the confidence to push your riding while having a LF'n good time doing it.

#### Features

- Hand-Glassed Construction
- Performance EVA
- EPS Foam Core w/ Wood Stringer
- Front & Rear Arch Bars
- Carbon Tape Reinforcement
- Quad Fins

#### Product Specs

#### **DIAMOND SQUARE TAIL**

The Diamond Square Tail has a larger surface area, allowing the board to plane and glide on top of the water with greater ease which enhances speed and acceleration, making it easier to generate momentum - even on smaller wakes.

#### **DURA-SHELL**

With all the performance features and light-weight design of a hand glassed surfer, but the resilience and dependability of a compression molded. Dura-Surf is where it's at!

#### **WIDER PROFILE**

# **DRIVE**

# **EL GUAPO**

Slide your toes up to the nose for a Hang-5 or dip your head in the curl – while lookin' "muy guapo!" Size: 5-6

The Guapo features our easy to ride long board shape that always brings the stoke! The full-bodied shape and bevelled rails allow for smooth effortless rides and the concave hull keeps the board humming along at a nice pace. An adjustable single center fin box lets you adjust how tight your Guapo turns. Move it forward for a looser feel or shift it back to the rear for a tighter, more driven feel. You are going to be the best-looking person on the lake on the Guapo, guaranteed!

#### Features

- Dura-Surf Construction
- Single to Double Concave Hull
- Stringerless EPS Foam Core
- Soft Catch-Free Rails
- Longboard Rocker Line
- Cruiser Single Fin

#### Product Specs

LENGTH	WIDTH	THICKNESS	ROCKER	VOLUME	FINS	WEIGHT RANGE

# **UNIQUE SHAPE**

Truly a unique shape to wakesurfing, dedicated to stoke and just having a great time!

#### **WIDE TAIL**

Mid-wide Tail gives you that cruise-control feel while in the pocket, but ready to break free and start slashing the moment you're ready to carve!

#### **ADJUSTABLE FIN BOX**

The Adjustable Fin Box allows you to move the rear fin forward or back, allowing you to truly dial in how your Guapo carves – Locked in to Super Loose, you've got it all!

# DRIVE

Tommy Czeschin Driven Innovation Sizes: 4-0 / 4-5 / 4-10 / 5-3

The Primo has earned it's place as Liquid Force's undisputed fan favorite and the most versatile board in the lineup. Tommy Czeschin's ADI Model blends surf and skim into one mind-blowing ride with a fin setup that's as flexible as your vibe each set. Feeling flowy? Set it up with twin fins and slash like you're carving ocean waves. Feeling like spins and shuv-its? Drop in the single rear fin for a loose, skim-inspired feel. However you choose to ride, the Primo delivers smooth speed, quick snaps, and that "just one more pull" kind of fun!

#### Features

- **Dura-Surf Construction**
- **EVA Surf Traction**
- Stringerless EPS Foam Core
- Tri Fin Setup
- Single Concave w/ 4x Channels
- Squash Tail

#### Product Specs

# SURF

# ROCKET

Hands down, the best entry-level Wakesurf Board ever made! Sizes: 4-8 / 5-0 / 5-4

Our sure-footed Rocket is our most stable board in our surf line, perfect for giving everyone on the boat a huge confidence boost. It uses a winged swallow tail design which allows for a fuller shape, adding stability. While the single to double concave hull gives smooth, flowing glide. Can be ridden as a twin "fish" or as a thruster for added drive down the line.

#### Features

- **Dura-Surf Construction**
- Soft Catch-Free Rails
- Stringerless EPS Foam Core
- **Quad Fins**
- Single to Double Concave Hull
- **EVA Surf Traction**

#### Product Specs

LENGTH	WIDTH	THICKNESS	ROCKER	VOLUME	FINS	WEIGHT RANGE
in	in	in	in	liter		lbs
4-8	19.8	1.2	3.3"N / 1"T	15L	(2) Surf 3.0 (1) Surf C2.5	Up to 170

# STRATUS FUSELOCKTM

Get ready to dial it in!

Front Wing: 600\* / 725\* / 950 / 1100 Color: Black Carbon Rear Wing: Glide 150 Mast: 74cm High Mod

The 600 Stratus is the foil of choice for possibly our biggest foil frother on the team, Harley Clifford. Designed to maximise down-the-line speed, turn on a dime and recover from breaches with ease. With a stable yet fast foil profile the 600 excels in higher-speed wake foiling, dropping into ocean waves and ripping it with a Wing.

This wing does not come in kit form.

Say hey to the 725 Stratus, a compact powerhouse born from over a decade of dialled-in design. Delivering the kind of lift you'd expect from a larger wing, but in a sleek, high-performance build that's all about control, glide, and smooth flow. Locked in with our Fuse Lock system for unmatched stiffness and response, the 725 stays rock solid underfoot. Inspired by the ocean, it's not just a wake beast, the 725 opens the door to surf and wing foiling too. One wing, endless possibilities. **This wing does not come in kit form.** 

The 950 is your gateway into the Stratus lineup, perfect for riders looking for a high-speed weapon that still has plenty of lift and control. The 950 is a team favourite as it glides like a dream, pumps with ease, and gives you razor-sharp responsiveness for those deep carves and sweet aerials. This wing is all about performance. Paired with our rock-solid FuseLock system, the foil setup feels ultra-stiff and super dialled. Smooth control and instant response, every time you ride.

Slower speeds and smaller waves. The 1100 really shines on the back rollers and riding the waves peeling away from the wakes. Stable and still maneuverable. Use this to whip in off a jet ski to pirate some wakes or see how far you can go back on your boat.

#### Product Specs

SURFACE AREA	ASPECT	WINGSPAN	CHORD
cm	cm	cm	cm
600	8.2	70.2	11
725	8	76	12
950	8.4	87.3	13.5
1100	8.0	94	14.4

#### FUSELOCK\*\*

No wing wobble or delay in response with our new Fuse-Lock system's best-in-class stiffness and strength giving you maximum response and control.

#### **FAST ASSEMBLY**

Don't let bolts kill your vibe! With just 4 M8 bolts, our new systems are designed to be quick and easy to assemble to allow you to focus on what is important. Can you beat Luca Kidd's current full foil build record of 85 seconds?

#### **GLIDE 150 REAR WING**

With years of testing by our international foil team, we have designed a single tail wing to complement all our foil packages to keep things simple and easy. We found a balance between responsiveness, control and speed to give you a tail wing that performs no matter the requirements.

#### SUPERIOR STRENGTH

All Fuselock components are locked into the LF mast shelf for maximum strength and rigidity. Built with premium 3K Carbon for a truly best-in-class foil

# HORIZON FUSELOCK™

The Horizon line just got a major upgrade!

Sizes: 1050\* / 1200 / 1550 Color: Black Carbon Rear Wing: Glide 150 Mast: 74cm High Modulous

Years of foil engineering and technology from all disciplines of foiling have been applied to the

Horizon 1050 to produce the most forward-thinking foil system we have ever built. Designed to build on a rider's strength by pushing what is possible behind the boat or out in the ocean. A fine-tuned foil profile allows for a smaller surface area to produce lift comparable to larger foils of the past without compromising on performance

#### This wing does not come in kit form

With the all-new FuseLock system, the Horizon 1200 delivers maximum stiffness, effortless control, and a response that's as dialled as it gets. We've fine-tuned the foil profile on the Horizon 1200, taking everything that was great about the original Horizon 120 and cranking it up to 11. With a refined angle of attack and updated foil section, the 1200 offers more glide, better efficiency, and takes your performance to a whole new level. Time to push the limits!

With a focus on ease and stability during those early stages of flight, the 1550 gets riders up early and keeps them there for easy progression for day-one riders or cruisy turns on the 5th wake for the more experienced. Capable of riding the smallest of wakes/ocean bumps or being used in the lightest of winds, when winging. The Horizon 1550 will turn every day into a foil day.

#### Product Specs

SURFACE AREA	ASPECT	WINGSPAN	CHORD
cm	cm	cm	cm
1050	5.2	74.0	18.5
1200	5.3	80.0	19.5
1500	4.1	80.0	25.0

#### **FUSELOCK™**

No wing wobble or delay in response with our new Fuse-Lock system's best-in-class stiffness and strength giving you maximum response and control.

#### **FAST ASSEMBLY**

Don't let bolts kill your vibe! With just 4 M8 bolts, our new systems are designed to be quick and easy to assemble to allow you to focus on what is important. Can you beat Luca Kidd's current full foil build record of 85 seconds?

#### **GLIDE 150 REAR WING**

With years of testing by our international foil team, we have designed a single tail wing to complement all our foil packages to keep things simple and easy. We found a balance between responsiveness, control and speed to give you a tail wing that performs no matter the requirements.

#### SUPERIOR STRENGTH

All Fuselock components are locked into the LF mast shelf for maximum strength and rigidity. Built with premium 3K Carbon for a truly best-in-class foil

# Features Perfectly Paired with the Nebula Foilboard I FuseLock™ Fuselage System M8 Bolts Throughout 1200 or 1500 Stratus Front Wing 74cm Carbon Mast High Performace Glide Rear Wing Carrying Case STABILITY

# LAUNCH FUSELOCK

Start Strong. Fly Fast.

Front Wing: 1200 Color: Black Fiberglass Rear Wing: Control 235 Mast: 74cm Alloy The world's easiest foil to learn on just got a big new upgrade!

Built with progression in mind, the new Launch 1200 is designed to accelerate your learning experience and get you ripping in no time. The new Fuselock connection system reduced components to just three and maximises strength and stiffness, giving you a ride that you can trust time and time again. Constructed out of premium materials with the front and rear wings built for top-grade fibreglass, while the mast uses tried and tested aluminium to build a bomb-proof setup.

The Launch 1200 front wing is the easiest foil to begin your foiling journey. Requiring only slow speeds to generate lift, and once up and flying is stable, forgiving and predictable.

Paired with the Control 235 tail wing for the perfect balance between stability and maintainability, and a 74cm mast, the 1200 is the ultimate platform to gain foiling confidence.

#### **HORIZON LEGACY**

One Foil to Rule Every Session

Sizes: 155 / 120 Color: Blue Alloy Rear Wing: H24 Mast: 28" Alloy

The Horizon Surf 120 is built for riders who want speed, snap, and next-level flow. A true surf-style weapon that blends precision control with clean, efficient glide. With its medium aspect design, the 120 delivers solid low-end lift to get you up quick, then settles into a smooth, stable ride as you hit higher speeds. It's quick to respond, carves like a dream, and stays locked in through every turn.

The Horizon Surf 155 is built for the rider who wants to do it all. From first sessions, mellow wake lines and pushing the limits, the Horizon 155 brings surf-style flow with tech-driven precision. Packed with the lift and control to keep you coming back for more. A refined, thinner front wing profile delivers smooth, efficient lift without drag, while the H24 tail wing brings extra drive and rock-solid stability for clean pumps and locked-in turns. Whether you're linking endless bumps or carving up glassy pockets, the 155 gives you the control and confidence to push further, fly longer, and truly foil anything.

#### X FOIL BOARD

Next-Level Tech Meets Premium Performance Sizes: **4-0 / 4-4** 

The X is built tougher and stiffer, with more volume to help take your wake foil aerials to new heights. Its increased landing volume, sleek profile, and nose rocker keep your speed dialled on touchdowns, launching you right back into the ride. Inspired by the surf, the X isn't just for boosting behind the boat, it's ready to tear it up in the ocean, too. Whether you're chasing boat wakes or ocean swells, the X will take you further, faster, and with more control. Wherever you ride, the X excels.

#### Features

Perfectly Paired with the Stratus Foil Set

- Dura-Surf Construction
- Catch Free Seamless Rails
- Carbon Rails & Uni Stringers
- Performance EVA Deck Padding
- Footstrap Inserts
- X-tra Volume

#### Product Specs

LENGTH	WIDTH	THICKNESS	VOLUME	WEIGHT RANGE
	in	in	liter	lbs
4-0	17	2.1	20L	Up to 200
4-4	17.5	2.3	25L	160-240

#### X-TRA VOLUME

Get back on foil after touchdowns and supports the landing of bigger aerials.

#### **CARBON RAILS & UNI STRINGERS**

High-performance carbon lay-up for increased stiffness and response

#### **CATCH FREE RAIL DESIGN**

Narrower width for tighter turns and beveled front rails for better water displacement

#### **NEBULA FOIL BOARD**

Launch Sequence Engaged

Sizes: **3-8 / 4-2** 

The Nebula is built to launch your foiling into another dimension. Wrapped in our ultra-durable Dura-Surf construction, the Nebula is all about clean lift, fast response, and that dialled-in board feel. A concave deck keeps you locked in and connected, while bevelled chine rails make for smooth water release and quicker takeoffs. Underneath, the double concave to flat hull with a subtle kick tail reduces drag and helps you pop up effortlessly, making every start smoother and every flight more efficient.

#### Features

Perfectly Paired with the Horizon Foil Set

- Stringerless EPS Core
- Chine Rails
- Dura-Surf Construction
- Corduroy Deck Pad
- Carbon Reinforced
- M6 Foot Strap Inserts

#### Product Specs

LENGTH	WIDTH	THICKNESS	VOLUME	WEIGHT RANGE
	in	in	liter	lbs
3-8	17.5	1.3	13.2	Up to 200
4-2	19	1.5	16.4	Up to 240

#### **DURA-SURF CONSTRUCTION**

Stiff, Light, and Extremely Durable. Product quality you can get behind to help elevate your foiling experience.

#### **CARBON**

We add the industry's top of the line uni directional carbon fiber material. By adding material to our lightweight Aero™ cores this provides that ultimate stiff feel for maximum pop off the wake and reliable landings.

#### **FOOT STRAP INSERTS**

Ready to push your riding a little further? Keep your foil with you on Airs or Re-entries off the wake by adding some LF Air Straps!

#### NEW

#### **HORIZON FOIL BOARD**

Tuned for Takeoff

Size: 4-5

All new for 2026, the Horizon 4'5 is designed with your progression in mind. With a larger planing surface and increased volume, the Horizon makes launches feel buttery smooth while assisting recoveries and touchdowns to keep you on foil. The sleek flat base amplifies your control, keeping you locked in whether you're jamming the first wave, pumping around in the glass or cruising way back. Design from the ground up to accelerate your learning curve and keep you coming back for more.

#### LAUNCH FOIL BOARD

Your First Flight Starts Here

Size: 4-5

The Launch is built to get you up, flying, and frothing in no time. Designed with simplicity, stability, and progression in mind, it's the perfect board for those early sessions to get you hooked. With a generous outline and boosted nose rocker, the Launch gives you smooth takeoffs, soft landings, and a steady platform to build confidence fast. Our LF Foil Track System lets you dial in your setup with 4" of adjustability, so you're always riding in the sweet spot. The Launch comes strap-ready, so you can lock in and focus on flying. No fluff, no fuss, just the perfect board to kick off your foiling journey.

#### **CARBON STRATUS**

#### **FUSELOCK FRONT WINGS**

Sizes: 600 / 725 / 950 / 1100

#### Features

- Medium Aspect
- FuseLock System
- 3K Carbon

- Wing Tip Twist
- Anti-Vent Wing Tip
- M8 Hardware

The Stratus is for the progressive foiler looking for more speed and response. With a lower aspect ratio than our Horizon line, the Stratus is faster down the line and through turns giving you a platform for your most aggressive carves, longest pumps and biggest airs.

#### **MEDIUM ASPECT**

These Wings will glide faster and farther than Surf Style wings. The turns are genertated in the yaw direction making for quick pivoting direction changes

#### **CARBON HORIZON**

#### **FUSELOCK FRONT WINGS**

Sizes: 1050 / 1200 / 1550

#### Features

- Low Aspect
- FuseLock System
- 3K Carbon

- Wing Tip Twist
- Anti-Vent Wing Tip
- M8 Hardware

The industry's favourite wing just got even better! With adjustments to the Horizon foil profile and wing tip tech, the new Horizon is now even more stable and ripable right out of the gate. Designed to offer riders uncompromised control with a stable lower-speed lift to allow you to perform no matter the size of the wake or rider ability.

#### **SURF STYLE**

These Low Aspect Wings feature a longer chord length (leading to trailing edge) to maximize stability and give lots of easy forgiving low speed lift. They shorted wingspan allows for more drive inspired turns that give the feel of ripping a turn on a surfboard

#### **CARBON GLIDE**

**FUSELOCK TAIL WING** 

Sizes: 150 / 150 LONG

Giving you maximum glide and offered in two fuselage lengths to personalise your ride.

**28cm Fuse:** The perfect balance between responsiveness, control, and speed to give you a tail wing that performs no matter the requirements.

33cm Long Fuse: Increased glide and stability while maintaining performance.

#### **CARBON DRIVE**

FUSELOCK TAIL WING

Sizes: 175 | 28cm FUSE

Slight Dihedral to keep everything balanced and level coupled with a curved wing tip to lock into tight turns and drive the foil forwards.

#### 74CM CARBON FUSELOCK MAST

The Fuse Lock System Carbon Mast is composed of a lightweight high-density foam laminated with carbon fiber to create an elite blend of strength and weight. Bolting straight into your LF Front wing via our Fuse Lock shelf the connection between the Wing, Mast and Board has never been stronger. This increased stiffness and strength results in a major upgrade in responsiveness and foil feel for the ultimate ride.

#### **MAST ADAPTOR**

Allows Legacy Parts to Fit FuseLock System

The use of a Fuse Lock mast adapter allows for your current LF mast to connect to the new FuseLock Horizon and Stratus wings to fully upgrade your ride and keep you progressing!

Benefit from the advances in Foil design in the upgraded Horizon and all-new Stratus wings. More front wing options allow for more foiling potential and ensure you have the exact foil for the job.

Fuse Lock is our stiffest and most responsive system to date, with just one connection point reducing flex and lose of foil energy to zero.

Just 4 bolts and you're done! The new Fuse Lock system requires just 4 M8 bolts to connect the whole system together allowing for not only a quicker and simpler construction but an increase in overall stiffness and response.

#### AIR STRAPS

Sizes: 5Y - 12 Mens with Correct Placement

Time to get above the lip with some LF Air Straps.

Ergonomically designed to hug your foot in a comfortable yet secure way. Built from a soft EVA the Air Straps give you flex when you need it but lock you in for your biggest airs!

## fuselock

Simplicity, Strength, Response

#### **INLINE PRO**

Boost your boats surfing wave on most boat hulls! Sizes: **145** 

The LF Wakesurf Edge Inline Pro Wake Shaper 145 will make big wakes BIGGER! The Inline Pro 145 requires a flat surface measuring 3" tall by 13" long - hulls with an outward curve of more than 1/4" over 5", this is YOUR shaper! WSE suction cups will accommodate hull curvature. Adjustable design allows you to shift the WSE location on the fly to fine tune the perfect wave.

#### **PRO SHAPER 2**

Boost your boats surfing wave! Sizes: **145** 

The LF Wakesurf Edge Pro Wake Shaper 2 145 will make big wakes BIGGER! The Pro Shaper 2 145 requires a flat surface measuring 5" tall by 12" long clear of hull steps greater than 3/8". WSE suction cups will accommodate hull curvature.

Adjustable design lets you decide! Shift the Wakesurf Edge location on the fly to create deeper pockets or a longer wake face with more push.

#### Do not tether to boat

#### **MOD COMP VEST**

Necessity is the mother of invention, and in our case...innovation!
Sizes: SM / MD / LG / XL / XXL / XXXL Color: Black / Highlighter

Through passion and our relentless pursuit of providing the highest level of quality and performance, the Mod Comp was born. Designed for riders seeking the ultimate experience on the water, the Mod comp truly feels like a second skin...mirroring every movement you make with unincumbered mobility. Even though this is a non-CGA rated comp vest – you'll be beyond stoked with how much float this bad boy brings to the table. No more treading water while you wait for the boat to circle back or submerging your board underneath you to catch your breath – More Float; More Stoke. Make sure you get your hands on a new Mod Comp Vest for the 2026 Season and stand apart from the rest in both style and performance.

#### Features

- Full Super Stretch Neoprene
- Featherweight Foam
- Strategic Segmentation
- Integrated Cinch Belt
- Relaxed Fit
- Non-Coast Guard Approved

#### **50N RATING**

Rated Floatation per size offering (11lbs/5kg of Float). Recommended use for competent swimmers near land or help close by.

#### **PVC FOAM**

PVC Foam is Lightweight & Stretchable

#### **IMPROVED FIT**

Performance Fit with Tapered Waist and Wide Shoulder gussets.

### LIQUID FORCE For the PM

#### MBI

#### **FUSE COMP VEST**

We Just Set the Bar...And, It's Unbelievably High!
Sizes: SM / MD / LG / XL / XXL / XXXL Color: Cream / Char

Let's face the facts here. There isn't another Comp Vest in all of Wake that can match the Fuse's curb appeal. Not only in style, but in materials...function...and performance. Finally, a vest that matches your riding style. Designed to take a beating with it's state-of-the-art Securaprene, which is a bomb-proof blend of high abrasion resistant neoprene – the Fuse is ready to help you conquer the cable park, stack clips at your secret winch spot, or keep up with your progression session behind the boat. Each size of the Fuse Comp is specifically designed for that rider's body shape and flotation needs. It's this attention to detail at every level that will allow you to embrace your renegade spirit on and off the water. Defy the norm.
